

ORION PRESS

ELECTRONIC FILES SUBMISSION

Whenever possible, please send digital originals of your file as digital files will make ideal printed copies, rather than second generation printed copies generated from scanning. We accept files from Macintosh and PC - **Adobe InDesign (preferred native file)**, Adobe Illustrator, Adobe Photoshop, QuarkXPress and **Adobe Acrobat (PDF)**.

Please gather all of the layouts, artwork, graphics, fonts and any other files associated with your print project. If you like, use a compression program (Zip or Stuffit) to create a single file for sending to us.

NOTE: PDF files are the preferred file format.

We recommend a minimum of 300 dpi (including any separate graphic files), converted to CMYK colorspace, ***all fonts outlined AND embedded.***

If your file is set to your finished document size then no crop marks are necessary. However, if your file is ***NOT*** set to your finished document size, then please specify your trim area with crop marks, but ***DO NOT*** place crop marks inside the work area.

PDF print ready files:

- Minimum resolution of 300 dpi
- CMYK colorspace
- All fonts outlined and embedded
- Crop marks are ***NOT*** necessary if your electronic file is set to finished document size
- Specify trim area with crop marks for oversize files
(Do ***NOT*** place crop marks inside the work area)
